Glass Onion

Peeling Back the Layers of a Pro-China Online Ecosystem

Key Findings

- Graphika has uncovered a network of 43 domains and 37 subdomains that pushed pro-China messaging while posing as the New York Times, the Guardian, the Wall Street Journal, and other legitimate media outlets.
- We identified technical links connecting this network to two Chinese companies that Google's threat analysis group previously determined ran a [pro-China campaign](#) dubbed HaiEnergy. The tactics, techniques, and procedures (TTPs) used by the network closely resemble HaiEnergy and similar activity sets, including [Paperwall](#), DuringBridge, and BayBridge.
- These domains and subdomains hosted advertisements, Chinese state media content, and pro-Communist Party of China (CPC) messaging pulled from external websites. We linked the hosted content to 30 Chinese companies and three Chinese individuals involved in public relations (PR) and digital marketing.
- We identified evidence that these companies and/or individuals leveraged these domains in contracts to promote the activities undertaken by CPC-linked entities. It is unclear whether these entities were aware that the promotion involved domains that spoofed English -and Chinese-language media outlets.
- The domains copied specific design elements directly from the websites of legitimate outlets in an effort to make their impersonation more convincing. Many also shared the same content management system (CMS) template.
- After Chinese marketing and PR firms placed content on the spoofed websites, the likely clients often promoted the material on Chinese platforms and websites, claiming it as evidence that influential news outlets had covered their company.
- On Western platforms, Spamoufage-linked accounts amplified content from these domains, demonstrating overlaps between the Chinese influence operation and this ecosystem of Chinese PR and marketing companies.

Introduction

While monitoring the PRC-aligned influence operation known as Spamouflage (a.k.a. Taizi Flood, DRAGONBRIDGE), we observed a set of 41 Spamouflage accounts repeatedly posting links to two articles hosted on the domains alpeninsulatv[.]top and weeklytimesnet[.]com. These articles, both titled “Breaking News: Falun Gong’s Shen Yun Art Troupe Under Investigation by U.S. Government,” highlighted ongoing investigations into the U.S.-based spiritual group Falun Gong (法轮功) and its affiliated dance troupe, Shen Yun (神韵). Falun Gong and its leader, Li Hongzhi (李洪志), are perennial targets of PRC-backed influence operations and transnational repression.

These domains host various types of content, including articles promoting Chinese traditional medicine, commercial products, exhibitions and conferences, and cryptocurrencies. The article criticizing Falun Gong appeared on an additional eight domains spoofing English-language international media outlets, including the New York Times, Wired magazine, the Wall Street Journal, and the Guardian.

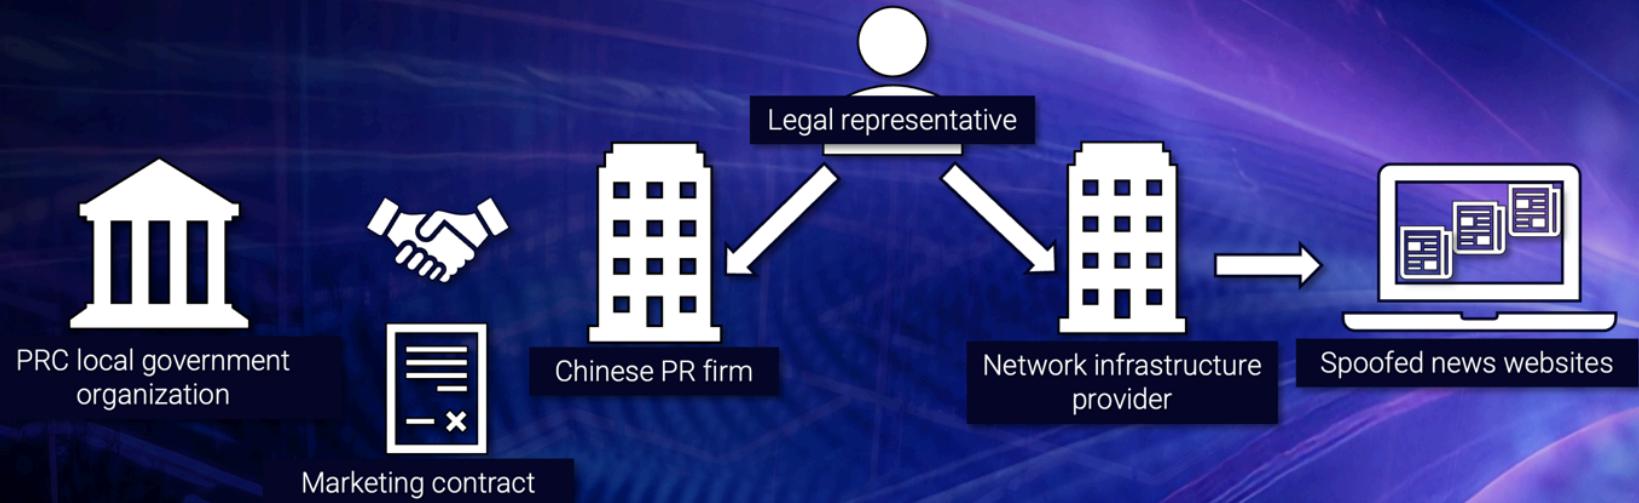

We also surfaced articles mentioning these 10 spoofed domains together, framing them as well-known and reputable media outlets. For example, a January 2025 article from a Chinese tea culture research institute claimed that “overseas official media” broadcast a recent interview with a representative of the institute. The article included links to the interview on the two aforementioned domains, as well as the eight others that criticized Falun Gong on spoofed international media outlets: globalviewlife[.]com, uaenewsnet[.]com, uswiredmagainze[.]com, worldnewstimesnet[.]com, ukguardiannet[.]com, newyorkdailynet[.]com, losangelestimesnet[.]com, and wallstreet-daily[.]com.

Through technical indicators gleaned from this set of previously unreported domains, Graphika surfaced a vast network of digital infrastructure and Chinese corporations whose behavioral patterns closely resemble previously documented campaigns, including HaiEnergy and Paperwall. Google Threat Intelligence Group aggregated these campaigns under the name Glassbridge, an umbrella group of four different companies that operate these campaigns. Our findings show that there are more than just four Chinese entities involved in these operations. This aligns with an October 2025 report from France’s Institute for Strategic Research (IRSEM), which outlined a diffuse ecosystem of Chinese digital marketing and PR firms operating hundreds of multilingual websites spoofing legitimate news outlets.

The activity we uncovered further illustrates how private, third-party public relations (PR) and marketing firms leverage domains spoofing international and Chinese media outlets to disseminate content from a variety of clients. These domains appear to primarily target Chinese audiences, but several domains are catered to English-speaking audiences outside of China. The firms have business contracts with CPC-linked entities in China. However, we are unable to determine whether these entities are aware of the deceptive nature of the websites.

Further, Spamouflage amplification of these domains [reinforces](#) the suspected deep ties between the PRC-backed influence apparatus and the Chinese private sector. Our investigation builds upon the rapidly expanding body of research documenting this influence technique popularized by China-based actors since 2022: leveraging the Chinese private sector to establish inauthentic news websites and launder pro-China messaging and IO content.

CHANGCHUN EXHIBITIONS

SPAMOUFLAGE CONTENT

Diagram visualizing the methods by which Graphika identified, investigated, and connected the digital infrastructure presented in this report. In some cases, we discovered contracts between local Chinese governmental organizations and Chinese PR firms and linked this activity to articles we had located (top). In other cases, articles provided no actionable signals through which we could link this activity to any government or corporate entities (bottom).

Actors

We identified 43 domains and 37 subdomains linked to 30 companies and three Chinese individuals. All domains and subdomains are hosted in China, and all companies and individuals are based in and operate out of China. This report breaks these into three smaller sets. Set 1 comprises websites that impersonate international English-language publications, Set 2 comprises websites that impersonate Chinese-language Chinese state media outlets, and Set 3 comprises websites that present themselves as general-interest news outlets. To avoid confusion, we use “domains” to refer to the spoofed media outlets and “websites” for all other domains associated with the companies and individuals engaged in this activity.

We assess that this ecosystem of domains and companies has technical links to the domains and activities of Haixun and Haimai, two Chinese companies that Google [found](#) operated networks of inauthentic news sites.

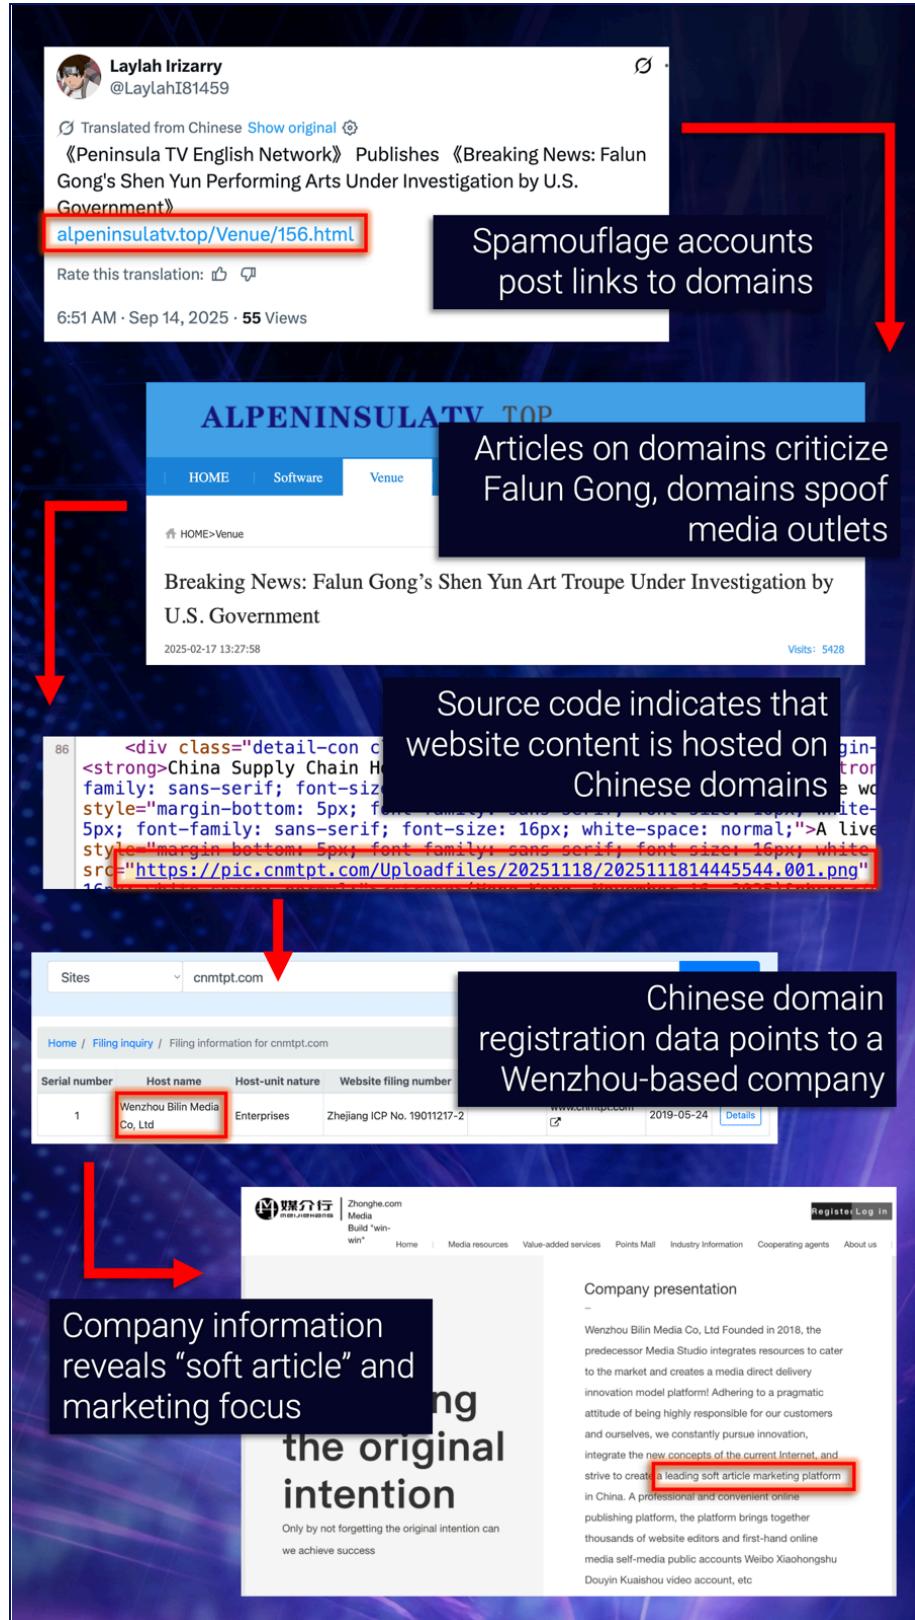

- Hangzhou Jijia Technology Co., Ltd. (杭州即家科技有限公司), one of the PR and marketing firms listed below, advertised packages hosted as Excel files on news.shiworld[.]cn, (a website linked to Haimai), and hosted as direct links to web.ebuypress[.]com, which [IRSEM](#) linked to Haixun.
- Two domains, alpeninsulatv[.]top and newsheadlinesnet[.]com, were first seen at 10:45 a.m. UTC on Sept. 21, 2022 – the exact same time as 24usnews[.]com, a website [linked](#) to Haixun and its HaiEnergy campaign. Within the next hour, another 10 domains from Haimai were also registered.

The network shares similar tactics, techniques, and procedures (TTPs) as observed in the reported activities of HaiEnergy, Paperwall, DuringBridge, and BayBridge. In the following chart, we compare the TTPs we observed from these activity sets, all of which are also present in the network we uncovered.

TTP Similarities			
HaiEnergy	Paperwall	Duringbridge	Baybridge
Content critical of CPC dissidents.	Mimicking local news outlets.	A set of subsidiaries rather than one particular company.	A set of subsidiaries rather than one particular company.
Overseas packages mimicking legitimate outlets.	Commercial ads, cryptocurrency ads, Chinese state media recycling.	News and press releases from various sources with no apparent links to coordinated influence operations.	Some companies located within the Greater Bay Area (China) with a similar taxonomy of entities involved.
External content hosting providers.	External content hosting providers.	External content hosting providers.	External content hosting providers.

Case study showing the placement and dissemination of an article targeting Falun Gong and Shen Yun amplified by likely Spamouflage-linked accounts.

Spoofed Mainstream Media Outlets Domains (Set 1)

We identified 12 domains and 12 subdomains that mimic international English-language media outlets, including the New York Times, the Los Angeles Times, and the Wall Street Journal. Two shared articles denigrating Falun Gong and Shen Yun that Spamouflage-linked X accounts subsequently amplified. We observed that these domains shared technical indicators, including matching IP addresses, registrant information, and [Autonomous System Numbers](#) (ASN) [assigned](#) to Alibaba's U.S. subsidiary. Some of these domains displayed similar website designs and content. Ten domains were created on Dec. 15 and Dec. 16, 2020. The other two were created on Sept. 20, 2022.

Spoofed Chinese Media Outlets Domains (Set 2)

Eleven domains and 25 subdomains mimic the appearance of Chinese state media outlets, such as China Central Television Network (CCTV), the People's Daily, and Phoenix Media (ifeng[.]cn).

Two of the 25 subdomains are under newyorkdailynet[.]com, one of the previously identified domains which spoofed the New York Times. The nine other domains are hosted on the same IP address as these two subdomains and share the same ASN.

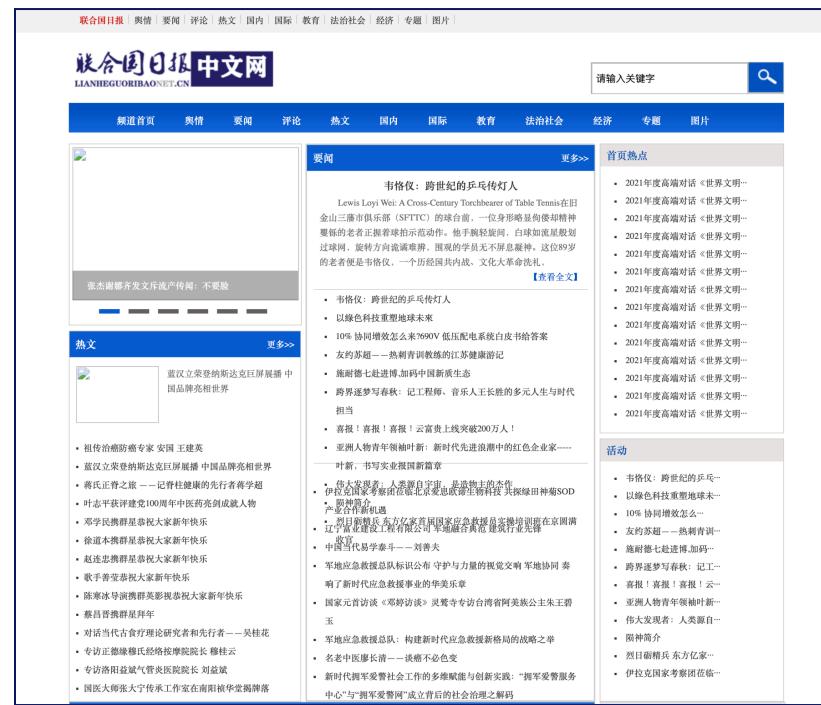

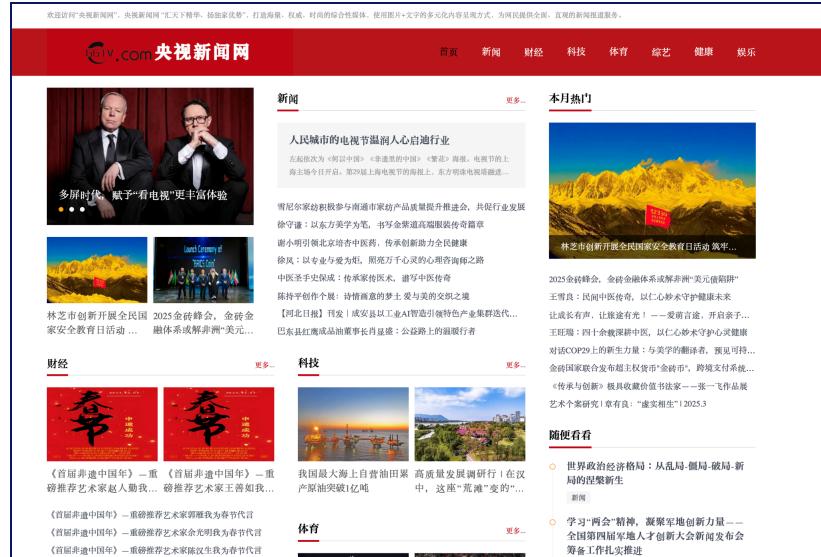

We linked the domains and subdomains through their shared IP address and ASN. Some of these domains shared similar website designs and content.

Spoofed International Media Outlets Domains (Set 3)

We identified another connected network of nine domains and multiple subdomains, which present themselves as news websites dedicated to covering specific countries. One of the domains, canannews[.]com, shared the same article targeting Falun Gong and Shen Yun, which Spamouflage-linked X accounts subsequently amplified.

We linked these domains through their shared IP address and ASN. These domains were all created on either June 27 or June 28, 2022.

The image shows two side-by-side screenshots of news websites. The left screenshot is for 'KenyaNews' and the right is for 'Cana News'. Both websites display news articles and images related to international events, such as the 'ICBC Cup' and traditional vs modern medicine.

Example of two domains kenyainews[.]com (left) and canannews[.]com (right) presenting as media outlets in Kenya and Canada, respectively.

We identified a further 90 domains, hosted on the same IP address as the nine domains in Set 3. These domains appear to spoof mainstream international news outlets (e.g., bbcnewsdaily[.]com) as well as general interest outlets (e.g., hollywoodinews[.]com and globalcarinfo[.]com). We provide a full list of domains in Appendix 1.

Domains Hosting the Content and Associated Companies

Almost all the domains and subdomains in the three sets displayed images and videos hosted on separate websites with ties to Chinese companies engaged in advertising, marketing, and publishing. When examining the three sets of domains, we identified 23 Chinese companies and three individuals connected to these domains.

Despite the large number of websites hosting this content, several indicators suggest that the same individuals and companies might collectively operate some domains.

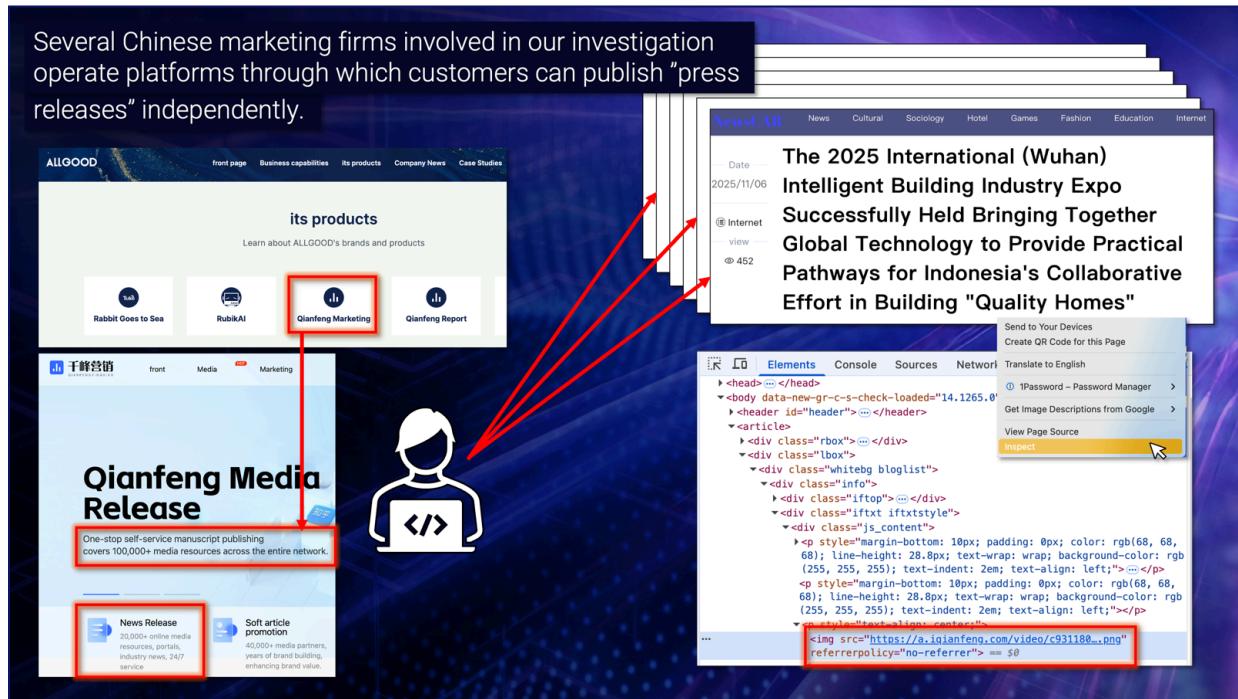

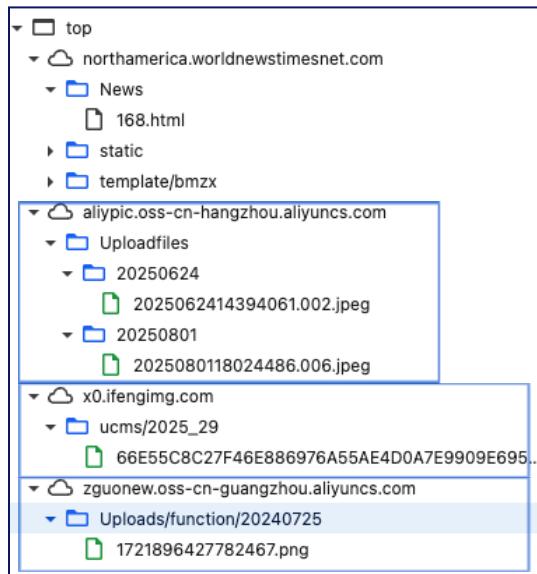

Diagram visualizing how Chinese marketing firm customers can publish press releases independently, and how Graphika linked online content back to these companies.

We found that on the same domain, content was pulled from multiple sources, including from private servers on Alibaba Cloud. This demonstrates that several stakeholders have permission to access the domains and upload content from these servers.

Example of the domain northamerica.worldnewstimesnet[.]com. The source code shows that content is hosted on two private Alibaba Cloud servers located in Hangzhou and Guangzhou, and one website connected to a Chinese company.

We identified content pulled from two companies that differed from the rest of the ecosystem:

- Shenzhen Tencent Computer Systems Co., Ltd. (深圳市腾讯计算机系统有限公司) The source code of an article hosted on losangelestimes[.]net corresponds to a Tencent News "ExEditor" image card, which is embedded directly from Tencent's Content Delivery Network (CDN) through the website inews.gtmimg[.]com. This suggests that the operators of the domains are using Tencent's CMS tools. This company is a key entity of Tencent Holdings.

```
<div class="exeditor-image-card" data-captcha="" data-copyright="0" data-qrcode="0" data-source="custom" data-type="image">![omapp](https://inews.gtmimg.com/om_bt/0I5tyE01TpL9jNH4v6K4ancwy_tN-0vFnyWXRHrxbdRwAA/0')
```

Extract from the source code found on losangelestimes[.]net.

- Jiangsu Xinhua Newspaper Media Group Co, Ltd. (江苏新华报业传媒集团有限公司) The source code of an article hosted on uswiredmagazine[.]com revealed the website jcdn.xhby[.]net. This website redirects to the app, "Meeting Point News," which distributes local news from the official provincial-level party newspaper of the Xinhua group in Jiangsu Province. This indicates that the domain was directly reusing, syndicating, or scraping content from Jiangsu Xinhua.

For instances in which the "Company Homepage" and "Link to article posting platform" are the same, this indicates that the company's homepage and the article posting platform are one in the same – the given company does not have a more general homepage.

We identified that several domains shared certificates with some of these host websites, suggesting some level of cooperation between some of the Chinese companies' websites and the domains.

Note: Data as of Nov. 25, 2025. Source: URLScan

- Five domains shared their certificate with the Chinese and international spoofed media outlets, including hqdaily.xaacmyk[.]com, cctvzsw[.]com, and wetimeman[.]com.
- Two domains' certificates are from the subdomain china.toutiao.nronet[.]com. The domain nronet[.]com is hosted on the same IP address as the subdomains app.uaenewsnet[.]com, jinri.newyorkdailynet[.]com, and whsc.alpeninsulatv[.]top.

- Two domain certificates came from cn-heyuan.oss.aliyuncs[.]com and cn-hangzhou.oss.aliyuncs[.]com. Aliyuncs[.]com is the domain for Alibaba Cloud services. OSS references an object storage service, Alibaba's scalable storage solution Cn-heyuan and cn-hangzhou identifies the physical location of the server as Heyuan, and Hangzhou, China. This means these domains are hosted on an Alibaba Cloud server in Heyuan and Hangzhou, respectively.

Three websites, meijiieka[.]com, pic.cnmtpt[.]com, and danews[.]cc, associated with three companies, were both hosting content and sharing the same certificates as some of the domains.

- meijiieka[.]com, which is operated by the company Hangzhou Jijia Technology Co., Ltd. (杭州即家科技有限公司), is hosted on the same IP address as ruanwen[.]pro and lianmeishe[.]com, two other websites hosting the content of the domains. On its homepage, the website meijiieka[.]com redirects its overseas packages offers to the websites "news.shiworld[.]cn" and "web.ebuypress[.]com", which have been identified as two of the websites where the companies Shenzhen Haimai Yunxiang Media Co., Ltd and Shanghai Haixun Technology Co., Ltd host their packages.
- pic.cnmtpt[.]com is operated by Wenzhou Bilin Media Co., Ltd. (温州比邻传媒有限公司), which describes itself as a full-service advertising media company.
- danews[.]cc is operated by the individual Lu Xu (吕栩). Lu is also the legal representative of the company Wuhan Shifengqinfen Network Technology Co, Ltd, whose website "toumeiw[.]cm" hosts content from the domains. The website articlef.danews[.]cc previously resolved to the same IP address 139.224.201.51 as toumeiw[.]cm.

The Marketing and PR Companies

When researching the domains' names on search engines, we identified websites for five additional Chinese companies that advertised the ability to place content on these domains and other alleged news domains. These companies often promoted this in the form of "press releases" to promote or publicize goods, services, or events on behalf of their clients. These companies did not host content on their own websites.

Example of [mijiyuan\[.\]com](http://mijiyuan[.]com), a website displaying its services for placing content on overseas media outlets. These media outlets redirect to the spoofed international mainstream media outlets from the first set of domains.

These companies, along with some of the content hosting companies, claimed to have access to thousands of influential, widely read domestic and international media outlets and social media platforms through strategic partnerships established with top global media and news agencies. In reality, the companies likely sold space on websites that only mimicked these prominent organizations, with a fraction of the traffic.

Screenshot of a company's website claiming strategic partnerships with multiple top global media and news agencies and displaying the logos of AFP, Reuters, AP, and others.

The Marketing and PR Companies	
蓝鹰时代传媒文化(北京)有限公司 Blue Eagle Times Media Culture (Beijing) Co., Ltd.	
广州视觉网络科技有限公司 Guangzhou Vision Network Technology Co., Ltd.

- Guo Weihua (郭伟华) is the legal representative of the company Guangzhou Vision Network Technology Co., Ltd. Three [articles](#) from local Guangzhou-based outlets [refer](#) to Guo as the Deputy Director of the Office of the China Foreign Trade Center. The articles [quote](#) Guo referencing a plan for "increasingly leveraging foreign media outlets to amplify our outreach."

Photo from the Greater Bay Area Importers and Exporters Association's [website](#). Guo Weihua, first on the left, is part of the China Foreign Trade Center Delegation and participated in a working group with the Chamber of Commerce.

The Clients

When researching the Chinese companies found in the source code of the spoofed mainstream media outlets (Set 1), we surfaced a [contract](#) and a [bid notice](#) posted on websites for the city of Changchun in China's Jilin Province. These documents reveal that the Changchun Municipal Bureau of Commerce contracted Jilin Baitao Culture Communication Co., Ltd. (吉林省柏涛文化传播有限公司, henceforth "Baitao") to promote Changchun's "exhibition activities."

The contract stipulates that Baitao will place over 50 promotional reports in international media networks, produce short-form videos, and launch a "Changchun Exhibition" column with over 350 articles on the so-called "New Media Weekly Review" app and website. The city of Changchun paid Baitao a total of 109,500 RMB (\$15,455) for its services. This business relationship likely produced an [article](#) on uaenewsnet[.]com that promoted an August 2023 technology expo held in Changchun, among other pieces of content in this network.

5 合作内容

5.1 乙方根据甲方提供的材料及需求需完成：

(1)长春市商务局举办重大展会消息及展会亮点宣传同步境外全英文网站以及英文中文版网站。包括但不限于：华尔街日报英文网；美国时代周刊英文网；洛杉矶时报英文网；纽约每日新闻英文网；英国卫报英文网；美国新科技英文网；世界新闻资讯网；美国连线杂志英文网；阿联酋新闻英文网；全球观点生活英文网；国际媒体中文版；印度时报；雅加达环球报；自由比利时报；罗盘报中文网；迪拜新闻；共同社中文版；韩联社中文版；英国镜报中文版；真理报中文版；欧洲时报中文版新闻；时代周刊中文版；华尔街中文版；彭博新闻社中文版；英国卫报中文版

- 3 -

Extract from a contract in Chinese, which includes the Chinese names of the spoofed mainstream media outlets (Set 1) found in the source code of these domains.

5 Cooperation content

5.1 Party B shall complete the following tasks based on the materials and requirements provided by Party A:

(1) The Changchun Municipal Bureau of Commerce will simultaneously publish information and highlights of major exhibitions on overseas websites, including but not limited to: The Wall Street Journal (English website); Time Magazine (English website); Los Angeles Times (English website); New York Daily News (English website); The Guardian (English website); New Tech (English website); World News Network; Wired Magazine (English website); Emirates News (English website); Global Views Lifestyle (English website); International Media (Chinese version); The Times of India; Jakarta Globe; Liberty Belgian; Kompas (Chinese website); Dubai News; Kyodo News (Chinese version); Yonhap News Agency (Chinese version); The Mirror (Chinese version); Pravda (Chinese version); European Times (Chinese version); Time Magazine (Chinese version); The Wall Street Journal (Chinese version); Bloomberg News (Chinese version); The Guardian (Chinese version).

- 3 -

English-language translation of a contract that includes the names of the spoofed mainstream media outlets (Set 1) found in the source code of these domains.

New Technology, New Face, New Track - First Day of the 14th Northeast Asia Expo

Published: Aug 24, 2023

开放,发展,合作,共赢!23日第十四届中国-东北亚博览会(以下简称第十四届东北亚博览会)在长春国际会展中心举行。这场今年以来我国举办的首场面向东北亚地区的国家级展会,吸引了国内外千余家企业参展,展示新产品、结识新伙伴、寻找新机遇,开拓新市场,共创美好未来。

Openness, development, cooperation, win-win! The 14th China-Northeast Asia Exposition(hereinafter referred to as the 14th Northeast Asia Exposition) was held at Changchun International Convention and Exhibition Center on October 23. Since the beginning of this year, China has held the first national exhibition for Northeast Asia, attracting more than a thousand domestic and foreign enterprises to participate in the exhibition, showing new products, meet new partners, find new opportunities, open up new markets, and create a better future.

第十四届东北亚博览会吸引众多市民前来参展购物。

The 14th Northeast Asia Exposition attracted many citizens to participate in the exhibition and shop.

The 10th GLA Global Logistics Conference Held Grandly in Dubai, UAE

Wan Aiguo was selected as the outstanding figure of Chinese medicine Liangjian in the 100th anniversary of the founding of the party

Screenshot of an article posted on uaenewsnet.com which promotes the 14th China-Northeast Asia Exposition held at Changchun International Convention and Exhibition Center. The article, published on Aug. 24, 2023, claims that the exhibition was held on October 23, but the exhibition took place from Aug. 23 to Aug. 27, 2023.

We found that Baitao's legal representative, Liu Lili (刘立莉), also represents Jingzhou JuKai Media Technology Co., Ltd. (荆州巨快传媒科技有限公司), one of the hosting content companies. We identified other contracts involving Baitao, including one with the Propaganda Department of the CPC Changchun Lianhuashan Ecotourism Resort Working [Committee](#) in 2022, another with the Changchun Lianhuashan Ecotourism Resort Commerce [Bureau](#) in 2024, and a third with the Jilin Provincial [Department of Veteran Affairs](#) in 2024.

Additionally, we found several indicators linking the spoofed Chinese media outlets (set 2) registrant information to two entities in the medical sector.

- These domains listed their registrant as Qi Guilan (齐桂兰) and the email address 413527086@qq.com.
- The email address redirected to 11 similar spoofed Chinese media outlets. One of these domains was hosted on the same IP address (47.243.88.228) as several websites in Sets 1 and 2.
- Six of these 11 new domains have registrant information that lists the individual Su Yanwu (苏艳午), Beijing Medical Culture Exchange Center (北京医道文化交流中心), and the company Contemporary Famous Doctors Culture Communication (Beijing) Co.,Ltd. (当代铭医文化传播(北京)有限公司), whose legal representative is Su Yanna (苏艳娜).

- Searching for these names on Google revealed a company data service on Baidu that listed both Su Yanwu and Qi Guilan as employees of Contemporary Famous Doctors Culture Communication, a Beijing-licensed radio and television program production company. The company lists the medical and healthcare sector as its main customer group, which is consistent with the focus of the Chinese spoofed media outlets on Chinese traditional medicine.

Comprehensive Visualization of the Chinese Ecosystem of Domains and Businesses

- Domain
 - IP Address
 - Individual
 - Company
 - ICP
 - Province|Municipality
 - Client

Map showing the provinces in China where the identified companies are located. Source: Created by Graphika with Flourish.

Behavior

The domains in all three sets are primarily focused on impersonating legitimate English- and Chinese-language media outlets. The operators behind these domains likely seek to deceive clients by placing client content on these domains and claiming that they are the outlets they impersonate. The sites hosted on these domains are often poorly constructed using the same CMS template. They feature content pulled from external sources, hosted on websites belonging to marketing companies. These companies offer “soft-article generation” services — content designed to present a product, brand, service, or opinion persuasively, using a news-style layout to enhance credibility. Accounts on both Western and Chinese platforms, including Spamouflage-linked accounts, amplify the low-quality content.

Impersonating Legitimate International English and Chinese Media Outlets

The domains spoofed both Western and Chinese news outlets. Some domains — such as uswiredmagazine[.]com and losangelestimesnet[.]com — closely mimicked specific outlets (e.g., Wired and The Los Angeles Times) in their URL structure, site titles, branding, and overall design. Source code review of these domains revealed that the operators copied specific design elements directly from the legitimate outlets.

```
navigation__logo-image">
  <picture class="standard-navigation__logo-image responsive-image"></picture>
</span></a></div>
<div class="standard-navigation__section--utility-links">
<div class="standard-navigation-account standard-navigation__section--utility-links-login">

<div aria-hidden="true" role="presentation" class="sc-dIvqjp ijIfc"></div>
<div aria-hidden="true" role="presentation" class="sc-hHEjAm hZnKrK">
<svg class="icon icon-bookmark icon-bookmark--activated" width="24" height="24" viewBox="-0.5 -9 10 32" fill="none">
```

Screenshot of the source code from uswiredmagazine[.]com showing design elements copied from [wired\[.\]com](https://www.wired.com).

Some domains, such as ifengvideo[.]cn and alpeninsulatv[.]top, nominally mimic specific outlets (Phoenix TV and The Peninsula [Qatar]), without attempting to replicate branding or design.

Other domains, such as carnewsinfo[.]com and canannews[.]com, presented as more general interest destinations, including an automotive news outlet and a Canadian news outlet, respectively.

Pulling Content From External Sources

The source code of the identified domains revealed that the images displayed on the news domains are not hosted on these domains, but are pulled from external websites. These websites are functionally content hosting providers.

**Maverick Power with SVAIRI to Incubate AI Come APP**

**News** weeklytimesnet

12:04 PM - Oct 22, 2023 1,119 Views

Maverick Power Technologies Limited, has announced its strategic collaboration with the Silicon Valley Artificial Intelligence Research Institute (SVAIRI) to incubate the groundbreaking AI Come APP. This innovative project aims to revolutionize artificial intelligence (AI) solutions and empower businesses across the globe. By combining Maverick Power Technologies' deep expertise in emerging technologies and SVAIRI's research capabilities to create a platform that enhances AI adoption and drives advancement in AI-powered applications.

AI Come is a leading convergent AI App that is available on Apple Store and Google Play Store. The app provides users with free smart chat and AI drawing services. It also offers "V Avatar" capital creation service and UBI "Service" program. The "V Avatar" program is designed to help individuals and businesses to liberate mental labor and repetitive physical labor. Through the "V Avatar" live venture system, it explores the infinite possibilities of the global e-commerce market and provides a platform for individuals and businesses to invest in AI-powered AI Come is unique in its UBI "Service" program, dedicated to solving the AI challenges and unemployment risks faced by entrepreneurs worldwide. Through the "V Avatar" live funding system, it not only provides opportunities to all entrepreneurs but also provides additional funding that additionally supports their development with significant venture capital creation.

Through this collaboration, Maverick Power Technologies will have access to SVAIRI's extensive research and development resources. By leveraging SVAIRI's expertise in AI, machine learning, natural language processing, and computer vision, the AI Come APP will be equipped with advanced algorithms that can analyze large amounts of data and generate valuable insights. This will allow businesses to understand consumer needs, improve decision-making processes, and achieve long-term growth.

Furthermore, the collaboration aims to create an AI ecosystem that fosters

## The 21st Changchun Agricultural Fair was successfully concluded

Published: Aug 30, 2022

On the afternoon of August 27th, the 21st China Changchun International Agricultural and Food Expo (Fair) was closed. The number of visitors reached 680,000, and nearly 50 million clicks went online. According to incomplete statistics, 22 economic and trade cooperation projects were reached during the exhibition, with the intentional signing amount of about 175.65 billion yuan, and the on-site transaction volume of 3.3 billion yuan. The popularity, reputation and influence of the exhibition have been further enhanced.

It is understood that although the impact of the epidemic makes it difficult to attract investment and hold the exhibition, but there are still nearly 1,500 provinces and some domestic regions of the famous and excellent characteristic agricultural products enterprises to participate in the exhibition. During the exhibition, all cities, Changchun counties (cities) and development zone displayed the achievements of modern agricultural construction, attracted many "auspicious brand" brand enterprises; Sichuan, Liaoning, Heilongjiang, Beijing, Shanghai, Tianjin were invited to participate in the supply and marketing characteristic exhibition "832 platform" agricultural products area organized 60 enterprises, more than 40 categories, more than 1200 kinds of products to display and sell.

## Recycled Chinese State Media Content

The inclusion of this content in these networks is likely due to contractual arrangements between Chinese state media and these firms. Most of the Chinese state media articles within these networks are hawkish and critical of the West, particularly the U.S. However, this content is far less common than advertisements and promotional materials for goods and services. In these cases, we were unable to identify the company that had placed the content due to increased obfuscation of content hosting.

## Appendix 2: Estimative Language Legend

### Assessments of Likelihood

Graphika uses the following vocabulary to indicate the likelihood of a hypothesis proving correct. If we are unable to assess likelihood due to limited or non-existent information, we may use terms such as “suggest.”

| Almost No Chance | Very Unlikely | Unlikely | Real Chance | Likely | Very Likely | Almost Certain(ly) |
|------------------|---------------|----------|-------------|--------|-------------|--------------------|
| 1-5%             | 5-20%         | 20-45%   | 45-55%      | 55-80% | 80-95%      | 95-99%             |

### Confidence Levels: Indicators of Sourcing and Corroboration

Graphika uses confidence levels to indicate the quality of information, sources, and corroboration underpinning our assessments.

| Low Confidence                                                                                                                   | Medium Confidence                                                                                                                   | High Confidence                                                                                      |
|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|
| Assessment based on information from a non-trusted source and/or information we have not been able to independently corroborate. | Assessment based on information that we are unable to sufficiently corroborate and/or information open to multiple interpretations. | Assessment based on information from multiple trusted sources that we are able to fully corroborate. |

---

## About Us

**Graphika** is the most trusted provider of actionable open-source intelligence to help organizations stay ahead of emerging online events and make decisions on how to navigate them. Led by prominent innovators and technologists in the field of online discourse analysis, Graphika supports global enterprises and public sector customers across trust & safety, cyber threat intelligence, and strategic communications spanning industries including intelligence, technology, media and entertainment, and global banking. Graphika continually integrates new and emerging technologies into our proprietary intelligence platform and analytic services, empowering our customers with high-precision intelligence and confidence to operate in a complex and continuously evolving information environment.

The background is a dark, futuristic digital space. It features a dense field of glowing blue and purple particles of varying sizes. Overlaid on this are several thin, glowing lines in shades of blue, green, and pink, some forming loops and others extending across the frame. In the lower right, there are several translucent, glowing blue rectangular blocks arranged in a 3D perspective. The overall effect is a high-tech, digital environment.
